

*Professor Andy McIntosh presents
a weekend series on*

The Science of Creation

February 24 -25, 2018 at RBCL

Saturday, Feb 24

5 pm

Why Creation is important

How should a Christian understand Genesis? Professor McIntosh will cover creation by God's Word, a real Adam made from dust, and the subsequent global Flood, with scientific support for these events.

7 pm

The Wonder of Hearing

There is a wonder of miniature engineering in each one of our ears! Professor McIntosh will track the incredible system from the ear drum into the inner ear—and more!

Sunday, Feb 25

9.30 am

Creation and the Cross

For Sunday School, Professor McIntosh will focus on redemption and its intricate connection to Creation and the Fall of Adam.

Professor Andy McIntosh

holds a Research chair in Thermodynamics and Combustion Theory, and is adjunct faculty at Mississippi State University.

Professor McIntosh has debated academics in a number of Universities; he continues to lecture and speak on apologetics in many countries on the importance of origins, scientific evidence for creation, and intelligent design.
